Mina Noshy

Cairo, Egypt | (+20) 12-101-654-12 | mina-noshy@outlook.com | www.linkedin.com/in/minanoshywahba

Profile

Experienced Software Engineer adept in:

- Backend Development: Proficient in C#, SQL, and VB, with expertise in ASP .Net Core MVC and API development. Skilled in EF Core, ADO, Dapper, and LINQ. Experienced with Xamarin, Maui, and Blazor frameworks.
- Frontend Development: Competent in Angular, jQuery, and Ajax for dynamic and responsive UIs. Proficient in HTML, CSS, and Bootstrap for cross-browser compatibility and accessibility.
- Cloud Platform: Familiar with Microsoft Azure, specializing in deployment and management of web applications.
- Version Control: Basic knowledge of Git and GitHub for effective collaboration in software projects.
- Web Security: Well-versed in web security principles and mitigation of common vulnerabilities like SQL Injection (SQLI), Cross-Site Scripting (XSS), Account Takeover (ATO), and Cross-Site Request Forgery (CSRF).
- Languages: Fluent in English and native proficiency in Arabic.
- Additional Skills: Familiarity with XML and JSON, basic knowledge of Python, Java, and GoLang. Experience in desktop application development using WPF and Win Forms. Exposure to low code platforms like OutSystems, with a fundamental understanding of system and database design principles.

Education

Bachelor's degree in Information systems   **May 2019**
Sohag Higher Institute for Computer Science and Management Technologies

Skills

- C#
- MSSQL (SQL)
- Visual Basic (VB.NET)
- Python
- Java
- GoLang
- ASP.Net Core
- Entity Framework Core
- ADO.NET
- Dapper
- LINQ
- Xamarin
- Maui
- Blazor
- WPF
- Win Forms
- Angular
- jQuery
- Ajax
- XML
- JSON
- HTML
- CSS
- Bootstrap
- Microsoft Azure
- Git
- GitHub
- OutSystems
- System design
- database design
- SQL Injection (SQLI)
- Cross-Site Scripting (XSS)
- Account Takeover (ATO)
- Cross-Site Request Forgery (CSRF)

Work Experience

Elinx Infotech LLC | Mid-Level .NET Developer   **January 2022 – present**

- Developed and maintained backend systems using C#, SQL, and VB, focusing on ASP .Net Core MVC and API development, and desktop application development using C#, Win Forms
- Utilized EF Core, ADO, Dapper, and LINQ extensively for database interaction
- Deployed and managed web applications on Microsoft Azure cloud services

Egyptian Armed Forces | .NET Developer   **March 2020 – March 2021**

- Desktop application development using C#
- Utilized ADO, Dapper extensively for database interaction
